

Once a CE-ID has been created, users can go to either the app store and download the Natural Medicines app for free.

Side Note: The CE-ID's are also used to track any CE that is taken on the site, or through the Pharmacist Letter resource if they have access. Therefore, when anyone tries to create a CE-ID, they are asked for the last 4 numbers of the Social Insurance #, and their Health Profession. Anyone who does not need CE credits, will not need to put in their SI #, they can just put in zeros. Same with the health profession, if they do not plan on taking CE's for credit, they can just choose whichever profession they want.
