* **Comprehensive**

- Includes over 1,400 natural medicines monographs and ratings on over 185,000 commercial products

natural
medicines

Natural Medicines gives clinicians the tools they need to make informed, evidence-based decisions about dietary supplements, natural medicines, and integrative therapies. With 75+ percent of Americans taking at least one vitamin or supplement, it's important for clinicians to have a trusted resource on the safety, effectiveness and interactions associated with these products.

TOOLS INCLUDED:

Interaction Checker

to ensure that any drug/herb interactions are caught ahead of time.

Comparative Effectiveness

charts ranking natural medicines from most to least effective for a given disease state or condition.

Adverse Effects Checker

shows every natural medicine with the potential to cause a specific adverse effect.

Pregnancy & Lactation Checker

gives safety ratings related to pregnancy and lactation, and links to printable patient handouts.

Charts

allow you to quickly see all monographs tagged for a specific category, such as omega-3 fatty acids.

Continuing Education

courses focused on traditional and alternative methods for prevention and treatment of disease states and medical conditions.

Nutrient Depletion Checker

aides clinical decision-making, shows nutrients that may be depleted by prescription or over-the-counter medications, and rates the risk by clinical significance.
